COFFEE TIPS

Every cup of coffee is 98% water. Try brewing with filtered water – you'll taste the difference.

Coffee should be stored in an airtight container in a cool, dry place. It is very porous and will absorb odors, so don't keep it in the refrigerator.

Coffee should ideally be purchased whole bean and ground as needed – you get a much fresher taste. If you can't grind at home, we'd be happy to do it for you.
