

*Inn by the Sea* WHERE LUXURY COMES NATURALLY

DEFINING ECO-LUXURY ON THE MAINE COAST

Set in a location of unspoiled beauty, on sandy Crescent Beach, just seven miles from Portland's urban chic port city, the luxuriously contemporary Inn offers guests an experience that is pure Maine from the beach to the coastal setting to fully redesigned modern interiors. The 62 comfortably appointed rooms and suites, full-service spa, fireplace lounge, pool and regionally sourced menus in Sea Glass restaurant, create an atmosphere of eco-luxury that is distinctly Maine.

ROOMS WITH A VIEW

Modern, upscale one and two- bedroom luxury suites are designed around spectacular Atlantic vistas, with spacious living space and indoor/outdoor fireplaces perfect for an intimate romantic dinner or entertaining a group inside, or outdoors on furnished decks. Comfortable cottage style suites with two bedrooms, kitchens, fireplaces and outdoor decks, even the family dog will love, are focused on multi-generational travel.

EARTHLY BEAUTY AND HEAVENLY LUXURY

Spoil yourself in unspoiled Maine with an indulgent spa retreat. Our signature Sea Waves massage is the ultimate coastal experience with an undulating waves motion bed, with synchronized massage strokes and surf surround sound! Rejuvenate with relaxing natural therapies that give a nod to Casco Bay with restorative ingredients.

TABLE WITH A VIEW

Panoramic ocean views combine with Executive Chef David Brown's handcrafted menus with specialties fresh from the sea or nearby farms, making dining at Sea Glass a coastal culinary experience.

GREEN AND LUXURIOUS!

Nature itself has long been an integral part of our guest experience, and as a proud member of Beyond Green, the Inn is committed to preserving the natural beauty of our beach setting with habitat restoration, design features like solar panels and educational and fun programs that connect the guest to the coastal environment. Bug's Life for kids takes a look at our local ecosystems, adults learn to plant for wildlife in garden seminars, and families enjoy both beach ecology walks or exploring tide pools with a naturalist. The Inn collaborates with the State Park on Habitat Restoration, restoring food sources and habitat for local wildlife, and finding green solutions to invasive plants such as a herd of hungry goats.
